

Updating NCSP3 and NCSP35

- 1) Go to <https://in-command.net/>
- 2) Click on Control Systems at the top of the page, select iN•Command w/ **Global Connect**.
- 3) Scroll down until you see **Resources**. Click on **Software Updates**. Click on **Display Commander OS**, **Display Commander App**, & **Body Control Module**. Each file will download, **do not** change the file names, **do not** place the files within folders, and **do not** unzip the zipped file. Move the downloads to a USB flash drive - please use drives 16GB or smaller.
- 4) Insert the USB flash drive into the bottom of your iN•Command display.
- 5) On the iN•Command display, tap **Settings**.
- 6) Tap the **Down Arrow** and tap **Software**.
- 7) You should see the **DC**, **App**, & **BCM Version**. One at a time tap each one, and tap **Update**.

DC Update will power cycle and ask for crosshair calibration.

DC Version: **1.3.37** App Version: **1.12.126** BCM Version: **1.03.73**
